Joint Faculty Doctoral Programs in the Life Sciences

- Medicine and Dentistry - Veterinary Medicine
 - Agricultural, Nutritional and Environmental Sciences
 - Biology and Chemistry - Psychology and Sports Science
-

The International **Giessen Graduate School for the Life Sciences (GGL)** of the five Faculties above invite applicants for the

Doctoral Programs in the Life Sciences

The Doctoral Programs consist of a three-year interdisciplinary graduate course curriculum combined with an experimental project leading to a dissertation. Each doctoral researcher will be supervised by two professors from different faculties and will benefit from our Doctoral Researcher Development Program. Seminars and courses are conducted in English; German language courses are offered for international students. Depending on the project selected and own qualifications students may receive a stipend and may be eligible to register for one of the doctoral degrees offered at the Justus-Liebig-University Giessen (*Dr. med.*, *Dr. med. dent.*, *Dr. biol. hom.*, *Dr. med. vet.*, *Dr. biol. anim.*, *Dr. rer. nat.*, *Dr. agr.* and *Dr. oec. troph.*).

Applicants may choose between eight interdisciplinary research sections: Nutrition and Metabolism; Infection and Immunity; Heart, Lung and Blood Vessels; Protein and Nucleic Acid Interactions; Neurosciences; Reproduction in Man and Animals; Stress Resistance and Adaptation; Molecular Interactions at Natural Interfaces. A Master's degree or equivalent is required for admission.

Names of prospective supervisors and research projects as well as other information necessary for application can be found at:
