

The more information new technologies have provided, the fuzzier the bacterial species concept has become. Some even want to completely abandon the term “species”. (p. 22)

A team of Italian physicists is modelling how information might be stored in the firing rates of the neurons – a process assumed to be a prime step in memory formation. (p. 36)

Need a new kit for your daily RNA/DNA extraction? Before flicking through numerous catalogues, check out the product survey on DNA/RNA isolation kits. (p. 50)

Looking for a nice Christmas gift? Then take part in our lottery and win one of two magnificent calendars. All you have to do is unravel a little brainteaser. (p. 64)
