

Spanish science has a lot of catching up to do before it joins Spanish football at the top of Europe. However, will recent political promises really provide the expected boost? (p. 28)

Francisco Rodríguez-Trelles has participated in the elaboration of a model that provides a solution to the long standing enigma of how new introns originate. (p. 32)

Scientists usually learn how to write papers. With the advent of video journals, they should also learn how to properly prepare a film of their experiments. (p. 54)

Nice flowers, aren't they? *Lab Times* readers can win twelve of them, in our end-of-year calendar competition. Simply guess a famous scientist's name and trust your luck. (p. 64)
